

**Additional File 1. Figure S1. N1D is expressed in NGP-N1D and NGP-N1D+BV tumors.**

**A)** Immunostaining for human Fc indicates the presence of N1D in NGP-N1D tumors (right panel, red), but not in NGP-LacZ tumors (left panel). Bar=200  $\mu$ m

**B)** SDS-Page shows the presence of N1D (upper band) in NGP-N1D+BV, but not in NGP-LacZ+BV tumors. Presence of BV, which also contains Fc, is observed in both NGP-LacZ+BV and NGP-N1D+BV tumors (lower band).
